

Data sheet

Description

This connector has been specially developed for use in extreme outdoor conditions and is extremely durable and versatile. Thanks to its robust die-cast housing, it guarantees reliable performance - regardless of the environment and application. The connector is designed for retrofitting and accepts standard RJ-45 patch cables. The innovative D-shape housing ensures full compatibility with standard RJ45 sockets for the first time. This keeps the application flexible and universal, while significantly reducing risks and frustrations in the installation process. Ideal for professionals who need maximum reliability.

Connections

Connection	RJ45
Connection design	Connector
Connection alignment	180°
Connection type	without latch protection
Housing	Die-cast zinc

Item No.	EAN
8301	4260424514170
